

EAGLE STAR SECURITY × JB³AI

INTELLIGENCE IN THE FIELD. EVIDENCE IN THE SYSTEM.

JB³

RESTRICTED CLIENT BROCHURE

Eagle Star Security and JB³Ai: Your trusted partners for specialist intelligence, OSINT, undercover operations, and investigative matters that demand both boots on the ground and forensic-grade digital analysis.

THE PARTNERSHIP THAT CLOSES THE GAP

In today's complex risk landscape, you need more than traditional security. You need intelligence that connects what's happening on the ground with what can be proven in court.

Eagle Star Security's 12 years of field operations expertise meets JB³Ai's 20-year digital intelligence pedigree, delivering a discreet, lawful, and evidence-led service model built for the challenges that keep business leaders awake at night.

OUR PROMISE

32 Years Combined

Four decades of combined field operations and digital intelligence experience. We've seen it before—and we know how to resolve it.

100% Resolution Mandate

We don't stop until you have your answer. Every engagement is pursued with a full-resolution commitment, no loose ends, no unanswered questions.

1,500+ Global Sources

Our intelligence network extends far beyond South Africa's borders, giving you reach, depth, and verified insight wherever your risk exposure lies.

Eagle Star Security × JB³Ai

A specialist partnership combining 12 years of elite field operations with 30 years of forensic-grade digital intelligence. Discreet. Lawful. Evidence-led.

Our Capabilities

Field Operations • OSINT & Digital Intelligence • Undercover Investigations • Forensic Evidence Structuring • Corporate Risk Intelligence

42 Years Combined Experience

100% case resolution mandate. 1,500+ global intelligence sources. Forensic-grade evidence that stands up in court, disciplinary hearings, and boardrooms.

Built for Decision Makers, Who Need Real Answers.

“When physical operations meet digital intelligence, you get more than answers, you get resolution.”

JB³AI**

INTELLIGENCE SOLUTIONS

"Eagle Star provides the field capability. JB³Ai provides the intelligence layer. Together, we structure the facts."

FULL SERVICE CAPABILITY MATRIX

DOMESTIC / SPOUSAL INVESTIGATIONS

Spousal infidelity investigations
Cheating partner investigations
Matrimonial surveillance
Divorce-support investigations
Cohabitation verification
Lifestyle and movement checks
Child custody-related observations
Protection order / harassment evidence
Domestic dispute evidence gathering

TRACING / LOCATING SERVICES

Missing person , Vehicle tracing
Asset Trace & Recovery Investigations
Debtor tracing
Witness tracing
Employee absconding tracing
Address verification
Employment verification
Contact detail confirmation
Scam verification / Asset location support

CYBER AND OSINT & SOCINT CRYPTOCURRENCY

Extortion & Blackmail Investigations
Cryptocurrency tracking and tracing / recovery
Digital footprint checks,
Online profile verification,
Link analysis / Online dating profile verification
Evidence timeline reconstruction
WhatsApp/chat evidence structuring
Open-source intelligence reporting
Fake Payments / Facebook Scam / Bank Fraud

SURVEILLANCE SERVICES

Physical surveillance / Undercover agent placement
Privaat Speurders
Vehicle surveillance
Location/activity monitoring
Photographic evidence gathering
Video evidence (where legally permissible)
Pattern-of-life observations
Suspect movement reports
Site observation reports

BACKGROUND CHECKS

Corporate Investigations
Personal background checks
Employment background checks
Criminal record screening
Identity verification
Qualification verification
Reference checks
Character and lifestyle checks
Social media profile review

CYBER CRIME AND FRAUD - INTELLIGENCE

OSINT investigations
Social media investigations,
Digital footprint analysis
Link analysis / Catfish investigations
Evidence structuring
Case file preparation
Intelligence reports
Due diligence reports
Timeline reconstruction

Local and International Services: Multicultural and Multilingual Offerings

Business Owners & Executives facing unexplained losses or high-stakes decisions.

Legal Teams & Attorneys requiring evidence-grade intelligence for litigation.

Risk & Compliance Officers navigating fraud, supplier due diligence, or vetting.

Auditors & Insurers requiring structured evidence packs for forensic review.

COMMON SCENARIOS :

Internal theft · Supplier fraud · Executive vetting ·
Asset tracing · Corporate intelligence ·
Employee misconduct · Stock shrinkage ·
Procurement fraud · Conflict-of-interest checks ·
Business partner due diligence ·
Workplace drug-risk concerns ·
Unauthorized information leaks ·
Competitor intelligence · Tender irregularities ·
Ghost employees · False sick leave abuse ·
Insurance claim verification ·
Debtor tracing · Missing person tracing ·
Witness locating · Background screening ·
Pre-employment verification ·

Cohabitation verification Child custody support observations ·
Online dating/catfish verification ·
Scam verification · Tenant checks ·
Domestic worker/nanny vetting ·
Harassment evidence support ·
Threat / risk profiling · Social media investigations ·
Digital footprint checks · Lifestyle audits ·
Site surveillance · Vehicle/activity monitoring ·
Undercover workplace placement

WHO THIS IS

Field Intelligence & Private Investigation

Capability Through our operational partnership with Eagle Star Security, JB³ can support matters requiring a combined intelligence and field-investigation approach.

JB³ provides the digital investigative intelligence layer. Eagle Star provides the field capability.

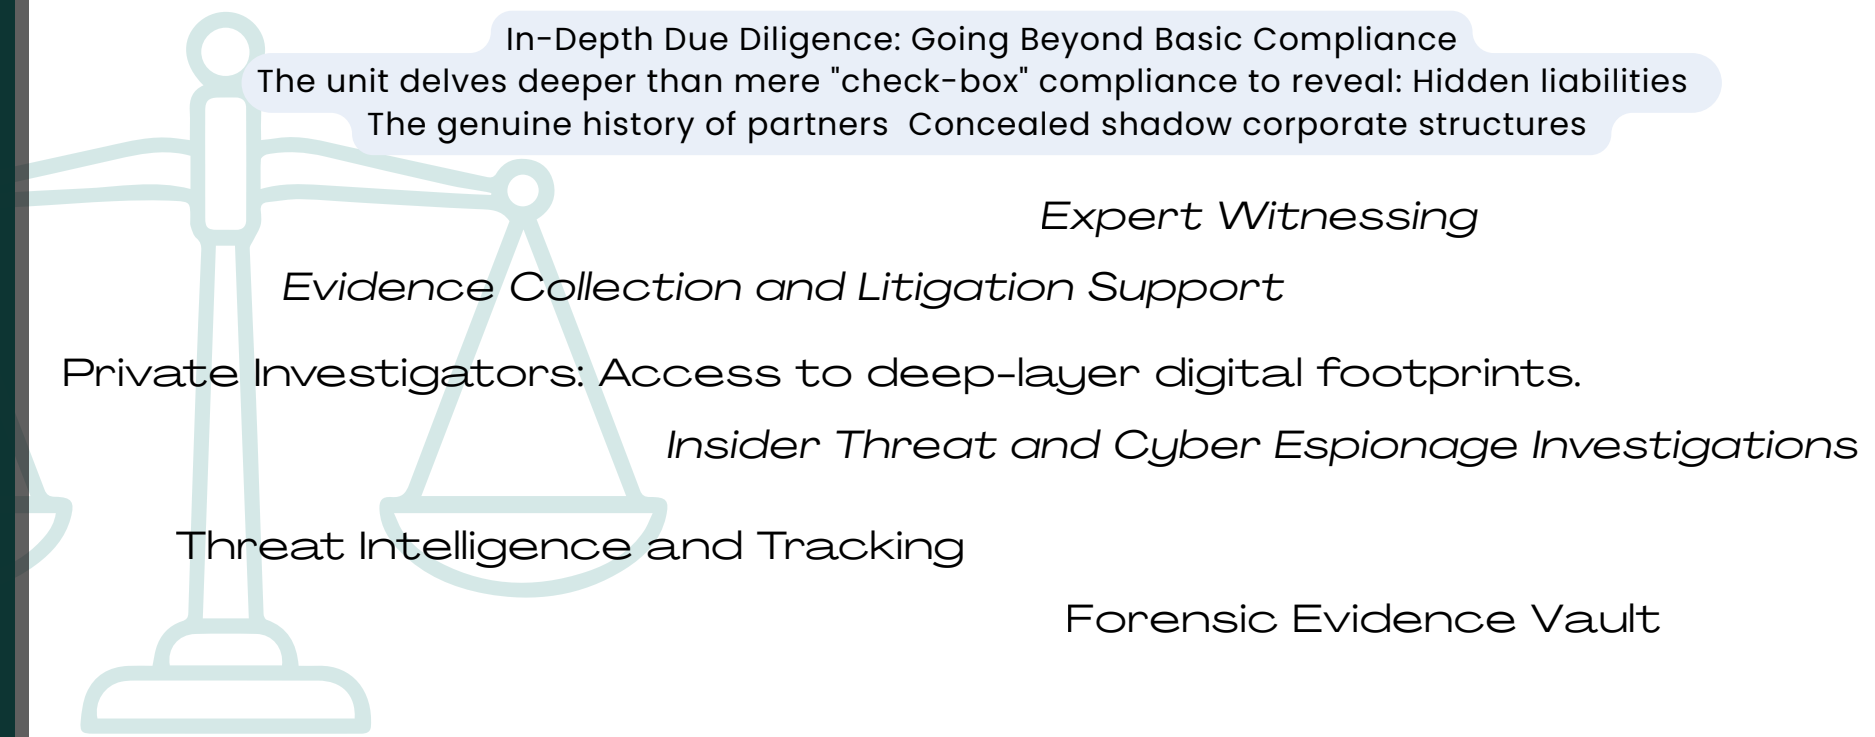

Together, the result is a lawful, evidence-led operating model. Private Investigation Support Capabilities may include corporate fraud enquiries, internal theft investigations, workplace misconduct reviews, background checks, due diligence, and evidence gathering, including video or audio where legally permissible.

Undercover Agent Operations The eyes you never see.

For high-risk environments affected by shrinkage, collusion, drug-related workplace risk, or internal compromise, Eagle Star's undercover capability provides discreet, structured field intelligence. This specialist capability is led by Director Moussa Touré, whose background includes twelve years of undercover experience before moving into distribution centre management.

His department was built around a practical reality, many business losses do not begin at the perimeter. They begin inside the operation. Undercover agents may be placed within an approved client environment for a defined period, usually three to six months, subject to legal review, mandate approval, and operational risk assessment. Their role is to observe, document, and report on internal theft, stock shrinkage, illegal workplace activity, collusion, compromised staff behaviour, unproductive or compromised employees, and evidence of criminal conduct where legally permissible.

Core principle: The biggest threat to a business is not always the burglar at the door. Sometimes it is the person already inside. We help identify the risk, evidence the pattern, and support lawful intervention

THE INTELLIGENCE GAP

Most investigations fail not because of lack of effort but because of a fundamental disconnect between field observations and digital proof. The cost of this gap is measured in lost cases, denied claims, and theft that never stops.

Without forensic-grade evidence handling, chain-of-custody protocols, and structured timelines, collected information may be unusable for disciplinary hearings, insurance claims, or legal proceedings.

This Partnership Closes That Gap Permanently.

“Traditional Security: Observations Lacking Evidence

While your security team may notice suspicious activities, without the appropriate tools to correlate these observations with digital evidence or broader criminal networks, these insights remain mere suspicions.

Without digital intelligence, it is impossible to ascertain whether observed activities are linked to a larger theft operation.”

THE THREE FAILURE POINTS

01 — Sees But Can't Prove

Traditional guarding notices suspicious behavior—unusual vehicle activity, staff acting strangely. But without digital tools to connect observations to evidence and criminal networks, insights remain just suspicions. Never actionable. Never court-ready.

02 — Finds But Can't Verify

Desktop OSINT uncovers aliases, company registries, and financial footprints. But without field confirmation of physical premises and actual operations, digital breadcrumbs may never reflect reality. That offshore supplier link? Unverified without boots on the ground.

03 — Gathers But Can't Structure

Traditional investigators collect information and photos—but without forensic-grade evidence handling, chain-of-custody, and structured reporting, the outcome is unusable for disciplinary hearings, insurance claims, or board decisions. Evidence that can't be used is evidence wasted.

PRIVATE INVESTIGATION SERVICES

DOMESTIC & SPOUSAL INVESTIGATIONS

Spousal infidelity investigations, matrimonial surveillance, divorce-support investigations, cohabitation verification, lifestyle checks, child custody-related observations, harassment evidence support, and domestic dispute evidence gathering.

SURVEILLANCE & EVIDENCE GATHERING

Physical surveillance, vehicle surveillance, site observations, photographic and video evidence gathering where legally permissible, pattern-of-life observations, and detailed surveillance reports.

Tracing & Locating Services

Missing person tracing, debtor tracing, witness tracing, employee absconding tracing, address verification, employment verification, and contact detail confirmation.

BACKGROUND & VERIFICATION CHECKS

Personal background checks, employment screening, identity verification, qualification verification, reference checks, character checks, social media profile reviews, and pre-marital or partner verification.

CORPORATE & WORKPLACE INVESTIGATIONS

Corporate fraud investigations, internal theft investigations, stock shrinkage investigations, workplace misconduct inquiries, employee dishonesty investigations, supplier due diligence, procurement irregularity investigations, and conflict-of-interest checks.

UNDERCOVER AGENT OPERATIONS

Undercover agent placement, internal staff infiltration, workplace drug-risk observations, theft and collusion detection, long-term operational reporting, and management intelligence reports.

DIGITAL & OSINT INVESTIGATIONS

Social media investigations, digital footprint checks, online profile verification, link analysis, evidence timeline reconstruction, WhatsApp/chat evidence structuring, and open-source intelligence reporting.

GENERAL INVESTIGATION SUPPORT

Tenant checks, nanny or domestic worker checks, babysitter checks, business partner checks, scam verification, online dating profile verification, catfish investigations, neighbour dispute observations, insurance claim support, asset location support, and general fact verification.

OUR ADVANTAGE

Dual-Layer Intelligence

Field observations are verified by digital intelligence. Digital findings are confirmed by physical reconnaissance. When both layers align, you get certainty—not suspicion. No other provider delivers this integrated capability.

Evidence That Stands Up

Every piece of intelligence is processed with forensic rigor: chain-of-custody, timestamps, hashing, audit trails, and full POPIA compliance. Your evidence pack will hold up in court, disciplinary hearings, insurance claims, and board reviews.

Speed Without Compromise

Our integrated tech stack, GPS tracking, digital incident reporting, AI-powered analysis, and real-time alerts—means we move fast, but never at the expense of accuracy, legal compliance, or the integrity of your evidence.

Three failure points. One costly gap. One solution.

OUR PROCESS

Every engagement follows a structured, lawful, and evidence-led methodology. From your first confidential conversation to the final intelligence pack, we work with precision, discretion, and a clear mandate to resolve.

STEP BY STEP

Step 1: Confidential Intake

Your concern is assessed in a secure environment. No judgment, no assumptions just careful listening and professional assessment of your situation.

Step 2: Risk Definition

We define objectives, intelligence depth, and success criteria together. What does resolution look like for you? We align on scope before a single step is taken.

Step 3–6: Plan. Deploy. Report.

Mandate confirmed in writing. Field and digital strategies aligned. Operational deployment begins, teams working in parallel. You receive a structured intelligence pack: findings, timelines, evidence, and next steps. Ready for action.

Absolute Confidentiality

Restricted engagements only. Vetted clients only. Your matter stays private, your sources stay protected, and your business reputation stays intact.

We operate under strict confidentiality protocols no data sharing, no third-party disclosure, no exposure risk.

How We Work: The 6-Step Engagement Model

STEPS 4–6

DEPLOYMENT & DELIVERY

Step 6: Evidence Reporting

You receive a structured intelligence pack: findings, timelines, evidence registers, risk indicators, and advisory review—ready for immediate action.

Step 5: Operational Deployment

Intelligence sprint or undercover placement begins. Field and digital teams work in parallel, feeding insights to each other in real-time for maximum coverage.

Step 4: Intelligence Planning

Field and digital strategies are aligned before deployment begins. Who goes where, what gets searched, how evidence gets captured all planned with precision.

WHAT YOU GET THAT OTHERS CAN'T DELIVER

WHAT YOU GET

This isn't a standard security service or desktop investigation. Eagle Star Security and JB³Ai deliver a specialist capability that others simply cannot replicate combining 32 years of combined field and digital intelligence experience into a single, evidence-led service model built for the challenges that matter most to your business.

MANAGEMENT-READY INTELLIGENCE

- Executive summaries
- Verified timelines
- Link analysis charts
- Evidence registers
- Risk indicators
- Recommended next steps

Ready for board review, legal proceedings, or disciplinary hearings.

You don't receive raw data dumps or scattered observations. You receive structured intelligence packs:

OPERATIONAL DEPLOYMENT

Some threats don't wear masks. They wear uniforms. They sit in your warehouse. They operate your tills. They drive your delivery trucks. And they steal from you not with guns, but with trust. The most dangerous criminals are the ones you already employ.

FORENSIC RIGOR

Chain-of-custody. Timestamps. Hashing. Audit trails. POPIA compliance. Every piece of intelligence is processed to evidentiary standard so your evidence pack holds up where it matters most. Our commitment to forensic rigor ensures that each element of the investigation is meticulously documented and verified. This precision not only strengthens the credibility of your evidence but also provides peace of mind knowing that all legal and procedural requirements are met. Whether you are facing a complex internal investigation or preparing for potential litigation, our comprehensive approach guarantees that you have the robust support necessary to navigate any challenge with confidence.

Internal theft · Supplier fraud · Executive vetting · Asset tracing · Corporate intelligence · Procurement irregularities · Stock shrinkage · Conflict-of-interest concerns · Employee dishonesty · Workplace misconduct · Insider threat indicators · Information leaks · Business partner risk · Vendor due diligence · Tender manipulation · Fraudulent claims · Debtor tracing · Lifestyle verification · Digital footprint reviews · OSINT intelligence · Undercover operations · Surveillance-based evidence gathering.

EAGLE STAR SECURITY × JB³AI

INSTITUTIONAL EXPERTISE & FORENSIC SPRINTS

Legal & Audit Litigation Support:

We provide comprehensive jurisdictional tracing services alongside meticulous financial means assessments, which are essential in establishing jurisdiction in cases where challenges arise or complexities hinder straightforward resolution.

Corporate & Insurance

Fraud Detection: Our team conducts thorough due diligence combined with strategic risk management practices, all aimed at safeguarding the integrity and security of the "Digital Empire," ensuring that vulnerabilities are mitigated and potential threats are preemptively addressed.

Public & Government

Anti-Money Laundering (AML): We offer specialized government vetting services alongside advanced technical discovery capabilities, specifically designed to support and enhance the efforts of law enforcement agencies in their fight against illicit financial activities.

Dark Web & Cyber Defense

Breach Monitoring:

Our experts diligently track breaches and meticulously construct a detailed severity impact roadmap, which serves as a crucial tool for ensuring effective digital containment and mitigation of potential damages in the cyber landscape.

Crypto & Asset Recovery

De-Anonymization:

Our approach employs sophisticated heuristic analysis techniques and node-level tracing methods, which are instrumental in identifying real-world exit points on the ledger, thereby facilitating the process of de-anonymizing transactions and recovering assets.

Satellite Operations

GIMS Framework: Introduced in 2025, our groundbreaking framework leverages the capabilities of Synthetic Aperture Radar (SAR) technology to penetrate cloud cover, providing a real-time monitoring solution for detecting and addressing illegal mining activities across diverse terrains.

Counter Forensics

Analysis Technique Analysis: We conduct in-depth analyses of the various methods employed by offenders to conceal their actions, thereby equipping agencies with the necessary insights to remain a step ahead in the ongoing battle against digital evasion and cybercrime.

Professional Practices:

Private Investigators:
Access to deep-layer digital footprints.

Risk Protection: Real-time threat identification and mitigation.

Insurance & Fraud: Advanced analysis to detect illicit activity.

Cyber Security: Assessing and neutralizing digital threats.

Law Professionals: Admissible digital evidence gathering.

Government: Swift digital identity verification and vetting.

Law Enforcement: Precise tracking of digital movement.

Journalism: Source authentication and disinformation defense.

Non-Profits: Investigative support for global safety.

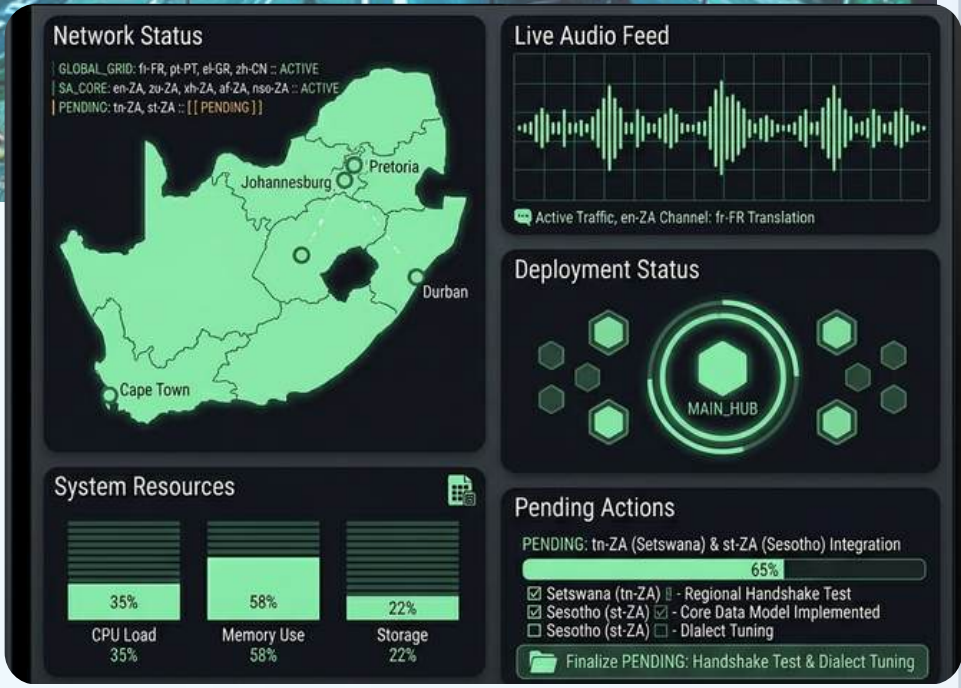

Anti-Money Laundering: Actionable intel on suspicious financial flows.

OUR INTELLIGENCE STACK

JB³AI INTELLIGENCE TECH

Four integrated platforms form the backbone of JB³Ai's forensic-grade digital intelligence capability. Each tool is purpose-built for investigative precision—and together, they deliver the structured evidence layer that field operations alone cannot provide.

AI-powered intelligence.
Forensic-grade evidence.
Decision-ready outcomes.

EAGLE STAR FIELD TECH

Our integrated field technology stack ensures every patrol, incident, and observation is captured, timestamped, and court-ready. Real-time visibility. Forensic-grade documentation. Immediate response capability—deployed and operational across every engagement.

Field technology that
connects every officer,
every observation,
every second.

Real-Time GPS Tracking

Every patrol vehicle and mobile officer is tracked in real-time. Live location data feeds directly into our command dashboard, ensuring full situational awareness and rapid deployment when and where it matters.

OS³ Dash

AI-assisted investigation platform with advanced pattern recognition and anomaly detection. Cross-references 1,500+ global intelligence sources to surface hidden connections, aliases, financial footprints, and behavioral indicators.

InvestigatorAi

Centralized intelligence operating system for end-to-end case management. Captures, organizes, and tracks every intelligence thread from intake to resolution with full audit trail and chain-of-custody compliance.

SVIS & IBM i2

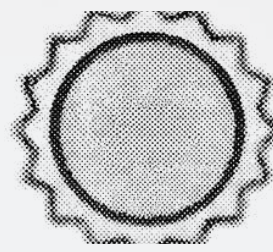

SVIS (Secure Voice Intelligence) delivers real-time alert signals for mission-critical triggers. IBM i2 Analyst's Notebook provides visual link analysis and relationship mapping—turning raw data into structured, court-ready intelligence packs.

AI Video Analytics

Cloud-based CCTV monitoring with AI-powered video analytics detects anomalies, flags suspicious behaviour, and integrates with mobile panic systems. One press triggers one alert to one coordinated team—response time under 20 seconds.

Digital Incident Reporting

Officers capture photo, video, audio, and timestamped notes at the point of incident. Reports are structured, cloud-synced, and immediately available—creating an unbroken evidence chain from field observation to intelligence pack.

OUR COMPLIANCE STANDARDS

SAPS Aligned

Coordinated with South African Police Service protocols for lawful evidence handling and chain-of-custody requirements.

SARS Compliant

All commercial engagements conducted within South African Revenue Service regulatory requirements.

ISO-Aligned Processes

Intelligence management, incident reporting, and evidence structuring follow ISO-aligned quality frameworks.

EAGLE STAR SECURITY × JB³AI

Risk Assessment Framework:

We eliminate the Information Void the space between a digital signal and a human response where liability lives.

Admissibility & The Legal Bridge

We convert raw technical data into Forensic Dossiers designed to survive cross-examination in the High Court. Our Digital Shadow Recovery Protocol reverse-engineers exfiltration paths to reclaim control of stolen assets.

GOVERNANCE & COMPLIANCE

LEGAL FRAMEWORK & CREDENTIALS

Operating within a fully regulated, lawful framework every engagement, every time.
PSIRA Registered.

Private Security Industry Regulatory Authority certified.
All field operatives and security personnel operate under valid PSIRA registration.

POPIA Compliant

All intelligence gathering, data handling, and evidence management adheres strictly to the Protection of Personal Information Act.

Data Sovereignty | SA North Region Hosting (Johannesburg)
100% Compliant | | Privacy (POPIA) | Automated AI Redaction & Consent Scripts | 100% Compliant | | Auditability | Permanent Immutable Intelligence Ledger | 100% Compliant | | Hardware | SABS & ICASA Aligned Signal Protocols | 100% Compliant |

ENGAGEMENT MODEL

Our engagements are structured to match your risk level and operational needs. Whether you require a once-off intelligence sprint or an ongoing retainer, every mandate is scoped, agreed in writing, and executed with full legal compliance and confidentiality.

Structured pricing.
Transparent scope.
Evidence-led outcomes.

SECURITY

Ready to close the intelligence gap?
Reach out to our leadership team directly.
All enquiries are handled with absolute confidentiality. Vetted engagements only.

PRICING OVERVIEW

Once-Off Mandate

Scoped per matter. Includes intake assessment, field and/or digital deployment, and a structured evidence pack. Pricing confirmed at mandate stage based on complexity, geography, and intelligence depth required.

Phase 1 Retainer

Entry-level retained capability. Includes monthly intelligence monitoring, OSINT footprint review, incident response support, and a quarterly risk briefing. Ideal for SMEs and growing businesses requiring ongoing awareness.

Phase 2 Retainer

Full-spectrum retained partnership. Includes all Phase 1 services plus active field deployment, undercover capability on standby, executive vetting, supplier due diligence, and priority case escalation with dedicated analyst access.

COMPLIANCE & GOVERNANCE

Eagle Star Security

PSIRA Registered | POPIA Compliant |
Forensic-Grade Evidence Protocols | Lawful &
Ethical Operations

All engagements are conducted within the full
bounds of South African law. Client
confidentiality is absolute. This is a restricted
client brochure for vetted engagements only.

JB³Ai

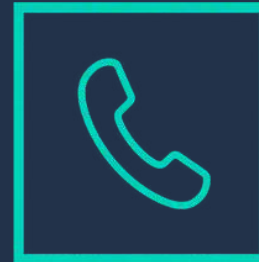

30-year digital intelligence pedigree. Forensic-
grade AI systems, OSINT, and structured
evidence intelligence for complex investigations.

Eagle Star Security

12 years of field operations expertise. Specialist
security, undercover operations, and physical
intelligence services across South Africa and the region.
