

JB³Ai Forensic Intelligence & Investigation Systems

Evidence-grade intelligence and investigation support for personal, corporate, legal, cyber, and asset-risk matters.

Founder-led intelligence

Human + AI fusion

OS³ command architecture

Discreet. Lawful. Auditable.

A handwritten signature in white ink, appearing to read 'J. Blackburn', with a long horizontal stroke extending to the right.

Jonathan Blackburn
Founder & Director, JB³Ai

JB³

The Intelligence Gap

Most investigations fail in the space between people, systems, evidence, and technology.

Traditional investigators often understand human behaviour but not complex digital systems.

IT teams understand networks but are not trained to preserve legal evidence.

Generic AI tools can process information, but they do not understand context, admissibility, or risk.

JB³Ai bridges that gap.

“True intelligence is not just finding data. It is turning scattered signals into a lawful, evidence-grade narrative.”

“ I have spent my life learning how machines work, how data is secured, and how human beings behave under pressure. I do not just run background checks, I use structured digital systems to surface actionable intelligence, map risk indicators, and support informed decisions that protect your business interests.”

The Forensic Backbone

“JB³Ai is the third evolution of a founder journey forged in engineering, recovery, diagnostics, and intelligent forensic systems.”

Elite Technologies built the electronic engineering foundation: automation, signal flow, control rooms, boardrooms, networks, and custom systems. iMED Medical Group added forensic discipline: ISO laboratory thinking, chain of custody, laboratory information platforms, toxicology, DNA, molecular diagnostics, and zero-error operational pressure.

JB³ now brings those worlds together: systems engineering, forensic integrity, AI automation, and real-world investigation.

True technical expertise is not gained in a classroom. It is built through real-world pressure, systems responsibility, and consequences. In 2006, I started Elite Technologies with a soldering iron and a backpack. Over 14 years, the business grew into a national technology firm designing secure boardrooms, automation centres, control systems, and corporate infrastructure.

My background also includes Trust in Hope, a registered halfway house in Pretoria, where I gained direct exposure to people under extreme personal pressure. That experience informs the human-behaviour layer of JB³Ai investigations.

"I combine deep-stack infrastructure knowledge with structured OSINT methodology to trace assets, map exposure, and deliver evidence-grade intelligence across both digital and financial domains."

2006

Elite Technologies

With more than two decades of technology and systems experience, I understand how complex infrastructure creates hidden risk. JB³Ai applies that knowledge to identify security blind spots, digital exposure, behavioural indicators, and evidence pathways that standard investigations may miss.

2015

Trust in Hope
iMED Laboratories & Forensics

In the forensic medical environment, a single mistake can undermine lives, reports, and legal outcomes. iMED Medical Group introduced ISO laboratory thinking, toxicology, DNA, molecular diagnostics, chain-of-custody discipline, and zero-error operational pressure. JB³Ai brings that same evidence-handling discipline into digital investigations.

2020

COVID Diagnostics
Forensic Infrastructure
DNA & Toxicology

Relevant technical foundations include DNA and molecular genetics exposure, Essential DNA Sequencing training through DNAbiotec, ISO 9001:2015 QMS Implementation and Auditing, and Applied ISO 14971 Medical Device Risk Management.

2025

JB³Ai and
OS³ Intelligence Systems

What We Do

Personal, corporate, legal, cyber, and asset intelligence.

01

Personal OSINT
Open Source
Intelligence
&
Digital Footprint
Intelligence

Social Media Intelligence (SMINT) is the structured review of social media signals, public content, behavioural indicators, relationship patterns, and preserved digital material. JB³Ai focuses on lawful collection, context, preservation, and evidence-grade interpretation.

02

Business & Corporate
Due Diligence:
People Intelligence.
Business Intelligence.
Threat Intelligence.

Legal Intelligence Support
JB³Ai provides legal teams with verified intelligence for case preparation, evidence review, due diligence, digital footprint analysis, and risk assessment. Findings are structured to support stronger decisions, clearer strategy, and better-prepared legal escalation.

03

Fraud, Legal &
Asset Recovery
Support |
Fiat &
Cryptocurrency

Fraud & Risk Intelligence
JB³Ai supports fraud review by identifying risk indicators, relationship patterns, lifestyle signals, exposed data, entity links, and digital evidence pathways. This helps insurers, companies, and investigators assess claims, internal misconduct, and financial exposure.

04

Cyber, Dark Web
& Exposure
Monitoring

Cyber & Dark Web Exposure
JB³Ai reviews breach exposure, leaked credentials, compromised assets, and dark web indicators. Infrastructure path analysis and exposure monitoring help clients understand digital risk and take informed action.

05

Satellite,
Geospatial
&
Infrastructure
Intelligence

Satellite & Geospatial
Intelligence
Land-use indicators, site-risk review, infrastructure change detection, and SAR/NDVI/BSI analysis support ground-truth verification and total area awareness.

All engagements are scoped around lawful collection, privacy protection, evidence handling, and practical decision support.

The Investigation Methodology

From scattered signals to evidence-grade intelligence.

All engagements are scoped around lawful collection, privacy protection, evidence handling, and practical decision support.

The Forensic Gold Standard

Data is only useful when it can be trusted.

JB³ applies forensic-grade discipline to every intelligence workflow.

[EVID]

Evidence Registers

Structured case records for captured intelligence, findings, sources, and report references.

[AUDIT]

Audit Trails

Actions, source checks, review steps, and report changes are logged where applicable.

[COC]

Chain-of-Custody Principles

Digital material is handled with clear preservation logic from capture to reporting.

[HASH]

Hashing & Preservation

Files and key artifacts may be hashed to support integrity verification.

[REDACT]

Redaction Controls

Sensitive personal information is masked or minimized where appropriate.

[SOURCE]

Source Logging

Findings are tied back to source material, capture time, and collection context.

[POPIA]

Privacy-Aware Workflow

Personal information is processed under lawful purpose, minimization, confidentiality, and access-control principles.

[REPORT]

Boardroom / Legal Review

Reports are structured for attorneys, executives, insurers, investigators, or escalation authorities.

Where applicable, digital evidence is preserved using defensible controls such as source logging, evidence registers, hashing, access control, and chain-of-custody principles, supporting later legal review, board-level decision-making, or escalation to attorneys and authorities.

Core Investigation Capabilities

Personal, corporate, cyber, financial, and infrastructure intelligence.

Seven integrated capability domains. One forensic standard.

01

OSINT & DIGITAL FOOTPRINT INTELLIGENCE

Public-source identity, reputation, exposure, scam, impersonation, and relationship mapping.

02

SMINT / SOCIAL MEDIA INTELLIGENCE

Social media pattern analysis, behavioural indicators, account linkage, content preservation, and timeline review.

03

CORPORATE DUE DILIGENCE

Director mapping, supplier risk, entity linkage, vendor risk, litigation signals, and reputation indicators.

04

FRAUD & ASSET INTELLIGENCE

Lifestyle indicators, means assessment, shell-company indicators, wallet mapping, and recovery-support intelligence.

05

CYBER & DARK WEB EXPOSURE

Breach exposure, leaked credentials, compromised assets, dark web monitoring, and infrastructure path review.

06

SATELLITE & GEOSPATIAL INTELLIGENCE

Land-use indicators, site risk, illegal mining indicators, SAR / NDVI / BSI review, and infrastructure change detection.

07

OS³ COMMAND DASHBOARDS

Case dashboards, evidence vaults, link-analysis workspaces, timelines, notes, and reporting environments.

JB³Ai turns disconnected signals into structured, searchable, auditable intelligence.

Sector Solutions

Intelligence workflows for high-risk decision environments.

- 01 **LEGAL COUNSEL**
Evidence-grade intelligence, litigation support, digital footprint review, and source-backed reporting.
- 02 **AUDITORS & FORENSIC ACCOUNTANTS**
Entity mapping, lifestyle indicators, asset signals, and transaction-context intelligence.
- 03 **CORPORATE RISK TEAMS**
Supplier risk, internal compromise indicators, employee/vendor relationship mapping, and breach exposure.
- 04 **INSURANCE & FRAUD TEAMS**
Claim validation, fraud pattern review, social media review, asset and means indicators.
- 05 **PRIVATE INVESTIGATORS**
OSINT, SMINT, geospatial, cyber, and link-analysis support to strengthen field investigations.
- 06 **GOVERNMENT / PUBLIC SECTOR**
Public-source intelligence, vetting support, infrastructure-risk review, AML indicators, and lawful mandate support.
- 07 **SECURITY OPERATORS**
Internal theft indicators, collusion signals, site-risk intelligence, and Eagle Star field-investigation support where required.

Where required, OS³ provides the secure command layer for case notes, timelines, evidence vaults, link analysis, and reporting.

The OS³ Command Layer

InvestigatorAi. ShieldAi. SVIS. Custom intelligence dashboards.

JB³Ai does not only produce reports. We build command environments that help teams capture, analyse, preserve, and act on intelligence.

PLATFORM COMPONENTS

- InvestigatorAi custom dashboard
- OS³ intelligence command view
- ShieldAi risk and exposure layer
- Secure Voice Intelligence System
- Evidence vault
- Timeline reconstruction
- Link-analysis workspace
- Tasking, case notes, and reporting

OS³ Dash provides structured command environments for ongoing operations. Custom dashboards consolidate case data, automate routine workflows, connect disconnected systems, and provide real-time operational visibility — helping teams operate with greater visibility and control.

"Intelligence becomes powerful when it is structured, searchable, auditable, and usable."

CRYPTO & ASSET RECOVERY INTELLIGENCE

Tracing value across wallets, entities, aliases, and infrastructure.

JB³ supports complex cyber and financial-risk matters through lawful intelligence workflows, wallet mapping, infrastructure analysis, breach exposure review, and evidence-grade reporting. The objective is to help clients understand where value moved, how it moved, and what escalation options may exist.

JB³Ai turns disconnected signals into structured, searchable, auditable intelligence.

Satellite & Geospatial Intelligence

The modern eye in the sky.

Geospatial intelligence supports land, infrastructure, asset, mining, agricultural, and perimeter-risk matters.

CAPABILITIES

- Satellite imagery review
- SAR cloud-penetrating analysis
- NDVI vegetation indicators
- Illegal mining and land-use indicators
- Remote asset-location support
- Infrastructure monitoring
- Temporal movement comparison
- Site-risk reporting

Utilizing OS³ ViewGrid satellite assets, Synthetic Aperture Radar (SAR), and automated change-detection indices (BSI/NDVI) to identify physical perimeter breaches, illicit land use, and tactical incursions through cloud cover and total darkness.

Satellite Security , We extend your security perimeter into space. We use high-end satellite radar to monitor your remote assets, spotting illegal mining, perimeter breaches, or trespassing through thick clouds and total darkness.

Applied Intelligence Scenarios

Confidential. Scoped. Evidence-led.

01

Ghost Asset Recovery

CHALLENGE

A high-value subject claims limited or no liquidity during a recovery action.

INTERVENTION

Open-source financial indicators, relationship mapping, shell-entity review, wallet and alias correlation.

OUTCOME

A structured intelligence report supporting asset-location strategy, legal review, and escalation planning.

02

MAZAZANI MineVoiceGrid

CHALLENGE

A high-risk industrial environment has communication gaps, multilingual floor language, and security concerns.

INTERVENTION

Secure voice capture, transcription, translation, anomaly detection, and overnight synthesis.

OUTCOME

An operational intelligence layer for security, safety, and early-warning review.

Scenarios are illustrative and subject to lawful mandate, available data, client authorization, and case-specific scope.

Field Intelligence & Private Investigation Capability

JB³ intelligence layer + Eagle Star field capability.

Through its operational partnership with Eagle Star Security, JB³ can support matters requiring a combined intelligence and field-investigation approach.

JB³Ai provides the digital intelligence layer. Eagle Star provides the regulated field capability. Together, the result is a lawful, evidence-led operating model for matters involving corporate fraud, internal theft, workplace misconduct, background checks, due diligence, shrinkage, collusion, and site-risk review.

Where undercover or field operations are required, these are scoped through an approved mandate, legal review, operational risk assessment, and partner compliance checks. Deployments may include structured observation, documentation, and reporting within legally permissible boundaries.

This specialized service is coordinated by JB³ and delivered with Eagle Star Security as the operational field partner. Eagle Star brings practical undercover and distribution-centre experience to matters involving internal theft, shrinkage, workplace misconduct, and collusion risk.

PSIRA-Aligned Field Operations

Regulated security and private investigation activities are handled through PSIRA-registered operational partners where required.

POPIA-Aware Intelligence Handling

Personal information and case data are processed under privacy-preserving workflows, redaction controls, secure storage, and lawful-purpose requirements.

SAPS-Cleared Operational Personnel

Where applicable, field personnel are vetted and cleared for operational deployment according to partner compliance standards.

OHS & Site Safety Awareness

Operational work is scoped with health, safety, access-control, and site-risk requirements in mind.

Evidence Handling Discipline

Digital and physical evidence is managed through source logging, chain-of-custody principles, audit trails, and defensible reporting.

Mandate-Controlled Deployment

Field activity is subject to written scope, lawful purpose, risk assessment, and client authorization.

JB³Ai operates within a strict ethical, legal, and evidentiary framework. Where regulated security, guarding, undercover, or physical investigation services are required, these are delivered through appropriately registered operational partners, subject to mandate, scope, jurisdiction, and legal approval. This brochure is general information only and does not constitute a risk assessment, legal opinion, deployment order, or binding contractual offer.

Engagement Model

Confidential. Scoped. Evidence-led.

- 1. Confidential intake
- 2. Risk and objective definition
- 3. Lawful data-source mapping
- 4. Intelligence sprint
- 5. Evidence-grade report
- 6. Advisory, escalation, or dashboard deployment

Regulated security and private investigation services are delivered through PSIRA-registered operational partners where required.

Partner compliance may include PSIRA, SAPS clearance, SARS, COIDA, PSSPF, B-BBEE, and CSD registration where applicable.
JB³Ai Forensic Intelligence Systems | Part of the OS³ Ecosystem

From Prototype to Public Impact

The JB³ product ecosystem has moved beyond concept.

OS³, Clipboard Ai, InvestigatorAi, VoiceGrid Ai, IsikoloAi, Newsroom, and DukeBox of London represent a working catalogue of practical AI-powered systems built for education, communication, intelligence, media, business operations, voice, music, and secure collaboration.

The next phase is deployment.

Partner, Sponsor, or Build With Us

JB³ is now opening conversations with clients, sponsors, technology partners, education partners, media partners, and organisations that want to support practical AI systems with real-world value.

Work With JB³

Book a consultation for business diagnostics, operational systems, dashboards, automation, AI-supported workflows, and custom product development.

Sponsor the Final Launch Stage launch

we need AI credits, hosting, sound engineering, testing, deployment, annual software tools, learner access, or infrastructure.

Request a Product Demo
